Module Code & Module Title

Course Work of IS

Assessment Type

Semester

2023/24 Summer

Student Name: Sulav Neupane

London Met ID: 22085653

College ID: NP01NT4S230006

Assignment Due Date: Friday, September 1, 2023

Assignment Submission Date: Friday, September 29, 2023

Submitted To: Hrishav sir

Word Count (Where Required):1000

I confirm that I understand my coursework needs to be submitted online via Google Classroom under the relevant module page before the deadline in order for my assignment to be accepted and marked. I am fully aware that late submissions will be treated as non-submission and a mark of zero will be awarded.

1. . Introduction

This report details the design and development of an e-commerce website for a store specializing in camera equipment. The website aims to showcase various camera products, provide valuable content related to technology's impact on daily life and business, and offer insights into

the components used in its creation. Additionally, the report discusses the team members' portfolios and the use of form functionality.

2. Project Goals and Objectives

The primary objectives of this project include:

1. Demonstrating an understanding of basic Internet technologies and their daily-life impacts.
2. Exhibiting competency in designing a website using appropriate tools and technologies.
3. Applying scripting languages to enhance web page functionality.
4. Implementing effective website structure and navigation principles.
5. Ensuring usability and accessibility in website design.

3. Website Design and Development

a) Home page

The home page serves as the main landing page and includes a brief description of the website's content and purpose. It provides an introduction to the various sections of the website, allowing users to navigate easily.

- `<html>`: The root element of an HTML page.

- `<head>`: Contains information about the document, such as the title and style sheets
- `<meta>`: Provides metadata about the document, such as the character encoding and viewport
- `<title>`: Provides the title of the document, which is displayed in the browser's title bar or tab
- `<link>`: Refers to an external style sheet.
- `<body>`: Contains the content of the document.
- `<section>`: Represents a standalone section, such as a header or a feature area.
- `<nav>`: Represents a section of a page that contains navigation links.
- `<a>`: Represents a hyperlink to another web page or to a specific location on the same page
- ``: Embeds an image in the document.
- `<input>`: Represents a form control for entering text.
- `<button>`: Represents a clickable button.
- ``: Represents an unordered list.
- ``: Represents a list item.
- `<h1>` to `<h6>`: Represents headings of different levels.
- `<style>`: Contains styling information for the document.
- `<script>`: Contains JavaScript code to be executed in the browser
- `<footer>`: This tag is used to define the footer of a webpage.

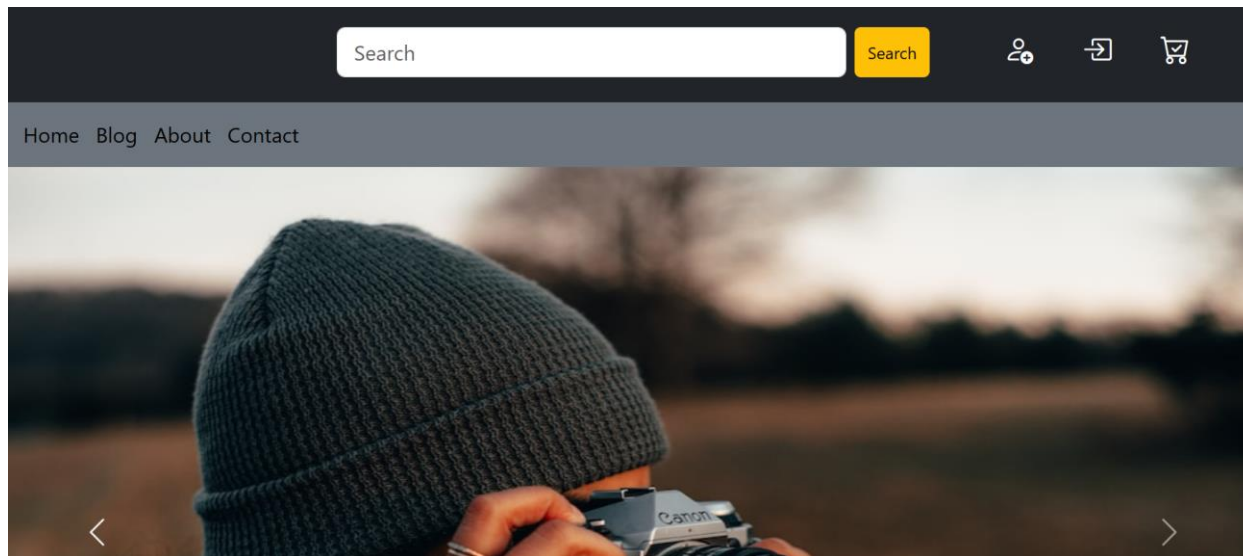

FIGURE 1 HOME PAGE

b) Blog page

The blog page demonstrates the impact of the technology on daily and business. It includes articles and posts discussing relevant topics, providing valuable insights to visitors.

Tags Used

- `<html>`: The root element of an HTML page.
- `<head>`: Contains information about the document, such as the title and style sheet
- `<meta>`: Provides metadata about the document, such as the character encoding and viewport.
- `<title>`: Provides the title of the document, which is displayed in the browser's title bar or tab.
- `<link>`: Refers to an external style sheet.
- `<body>`: Contains the content of the document.
- `<section>`: Represents a standalone section, such as a header or a feature area.
- `<nav>`: Represents a section of a page that contains navigation links

- `<a>`: Represents a hyperlink to another web page or to a specific location on the same page
- ``: Embeds an image in the document.
- `<h2>`, and `<h6>`: Represents headings levels.
- `<style>`: Contains styling information for the document.
- `<script>`: Contains JavaScript code to be executed in the browser
- `<footer>`: This tag is used to define the footer of a webpage.

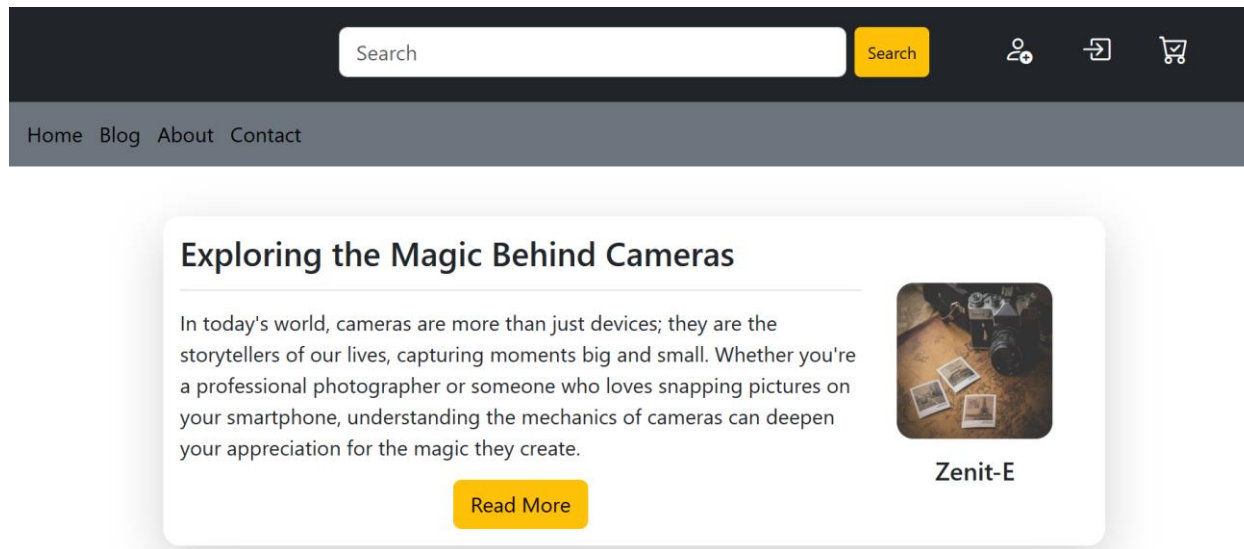

FIGURE 2 BLOG PAGE

c) About page

The "About" section provides detailed portfolios of each team member, encompassing technical and soft skills, educational backgrounds, volunteering experiences, certifications, and more. This section aims to establish trust and credibility with our audience.

Tags Used

- `<html>`: The root element of an HTML page.
- `<head>`: Contains information about the document, such as the title and style sheets.
- `<meta>`: Provides metadata about the document, such as the character encoding

- and viewport.
- `<title>`: Provides the title of the document, which is displayed in the browser's title bar or tab.
- `<link>`: Refers to an external style sheet.
- `<body>`: Contains the content of the document.
- `<section>`: Represents a standalone section, such as a header or a feature area.
- `<nav>`: Represents a section of a page that contains navigation links.
- `<a>`: Represents a hyperlink to another web page or to a specific location on the same page.
- ``: Embeds an image in the document.
- `<marquee>`: This tag is used to create a scrolling text.
- `<video>`: This tag is used to embed a video in the web page.
- `
`: This tag is used to insert a line break
- `<style>`: Contains styling information for the document.
- `<script>`: Contains JavaScript code to be executed in the browser
- `<footer>`: This tag is used to define the footer of a webpage

Discover the World of Cameras: Your Gateway to Visual Excellence

Welcome to our camera enthusiast's corner, where we dive deep into the captivating world of photography and the incredible devices that bring your visual dreams to life. Cameras are not just tools; they are gateways to capturing moments, emotions, and the beauty of the world around us. In this post, we'll take you on a journey through the essence of what makes cameras so

d) Contact page

The Contact Us page is a vital component of our e-commerce website. This page serves as a direct communication link between our business and our customers, providing a convenient and user-friendly way for visitors to get in touch with us.

Tags Used

- `<html>`: The root element of an HTML page.
- `<head>`: Contains information about the document, such as the title and style sheets
- `<meta>`: Provides metadata about the document, such as the character encoding and viewport
- `<title>`: Provides the title of the document, which is displayed in the browser's title bar or tab
- `<link>`: Refers to an external style sheet.
- `<body>`: Contains the content of the document.
- `<section>`: Represents a standalone section, such as a header or a feature area.
- `<nav>`: Represents a section of a page that contains navigation links.
- `<a>`: Represents a hyperlink to another web page or to a specific location on the same page
- ``: Embeds an image in the document.

- `<form>`: It is used to create an HTML form that allows users to enter data that is then sent to a server for processing. It is used once in the "form-details" section
- `<textarea>`: It is used to create a multi-line input control for text. It is used once in the "form-details" section.
- `
`: This tag is used to insert a line break
- `<style>`: Contains styling information for the document.
- `<script>`: Contains JavaScript code to be executed in the browser
- `<footer>`: This tag is used to define the footer of a webpage.

4. Technologies used

To develop the website, we utilized the following technologies:

1. HTML5 for structuring the web pages
2. CSS3 for styling and layout
3. JavaScript for dynamic content and form validation
Proper usage of HTML tags, including title, meta, img, table, div, and form
4. Internal, inline, and external CSS for styling
5. JavaScript for dynamic content and form validation
6. Properly structured file storage with appropriate naming conventions

5. Reference

- Code with harry=youtube

6. Conclusion

In conclusion, this project successfully achieved its goals of assessing students' understanding and competence in web technologies, design, scripting, structure, and usability considerations. The e-commerce website for the camera equipment store demonstrates a well-structured, functional, and user-friendly platform, showcasing the skills and knowledge gained during the coursework.

This project not only serves as a practical application of web development skills but also highlights the importance of user-centered design, accessibility, and rigorous testing in creating a successful e-commerce platform. It stands as a testament to the capabilities of the students in meeting the project's objectives.
